

Top tips: Explore the archive

The Horsham Posters Website is an online archive of over 1400 posters. The actual posters are looked after by Horsham Museum. Pictures of them were put online so that everyone could search through them.

The website has several ways to search through the posters:

1. The **Key Words** search in **Search the Catalogue**: This searches the words written on the posters. So you can see if a family name, a place or an exact date is written on one or more of our posters. It is best to only put **one** word in the **Key words** search box.
2. The **Select Posters** search:
This has three search options.
 - First search by **Subject** – e.g. World War One, Entertainments, Charity etc.
Tip: The Victorian Age is not a **Subject** because so many different things happened in those 64 years.
 - Second you can narrow down a subject search by choosing a **Secondary Subject** as well. These are different for each **Subject**.
 - Third by **Decade** – e.g. the 1840's

Once you find a poster you can look at its page. All the important information about the poster can be found on this page as shown below.

This is a copy of most of the text written on the poster.
