

2000.240

I have been greatly interested in the work of local government for many years, and I have the necessary time to give careful attention to its ever increasing requirements.

In my opinion the things needing attention are **Housing, Sanitation,** and the **Water Supply.** These require serious consideration, but they must be undertaken in the spirit of “**Efficiency with Economy.**” Efficiency does not mean grand schemes involving lavish expenditure, and Economy does not mean niggardly expenditure. True Efficiency and true Economy always go hand in hand, for real Economy consists in wise spending.

If you should favour me by electing me to be one of your representatives, it will be my policy to look at all questions from the point of view of the real needs of the locality, and to see that the ratepayers' money is spent wisely.

Yours faithfully,
FLORENCE E. BONWICK.
